PROJECTS

AUTOLANDIA Sales and Revenue Report Generation System

Capstone Project

<https://github.com/isaiahnoelsalazar/AUTOLANDIA-Sales-and-Revenue-Report-Generation-System>

Capstone project providing automated sales tracking, salary calculations based on performance, and activity records to reduce manual work and improve reporting accuracy.

Language(s): C#, Python, SQLite

Android Dependency

<https://github.com/isaiahnoelpulidosalazar/inpsAndroid>

An Android library that eliminates boilerplate across projects.

Language(s): Java, XML, SQLite

NuGet Package

<https://www.nuget.org/packages/inpsNuGet>

A NuGet package for .NET that simplifies validation through a custom Check class, a custom Convert class for data conversion, and a dedicated class that simplifies file IO through SimpleFileHandler.

Language(s): C#, .NET

Python Package

<https://pypi.org/project/inpsPyPI>

A PyPI package for Python 3.10+ that provides useful tools for data conversion and validation, a custom EasySQL class for simplified SQLite operations, a custom Excel file handler, and a custom file IO handler.

Language(s): Python
